

LensCoat® Olympus 100-400 INSTRUCTIONS

Piece 1- Lens Hood Cover

Remove the lens hood cover from the lens. Carefully slide and stretch the lens cover into place.

Piece 2

Remove rotating collar foot for easier placement of piece 2-4, stretch and slide piece 2 down the lens just past the focus ring. If you will be using the Zoom Sleeve, you may or may not wish to use this piece.

Piece 3

Slide piece 3 down the lens to the focus ring.

Piece 4

Slide piece 4 it down the lens to the zoom ring.

Piece 5

Slide piece 5 lining up the lock switch window and AF/IS controls. **For final placement pull the window for the slightly away from the lens and adjust to the left or right.**

Piece 6

Slide piece 6 over the last section of the lens. You can use the notch to line up with red alignment dot.

Optional Piece for when not using lens foot-

Piece 6b

If you are not using the lens foot you can slide piece 6b over the last section of the lens. This piece is used instead of Piece 6

Rotating Lens Collar

The LensCoat® Olympus 100-400 lens cover kit includes a strip of neoprene with adhesive tape applied to the back for the rotating lens collar. Cutout the desired length for the parts of the lens collar you want to cover. Cut the longest piece first. After all the cutting is done then remove the adhesive tape backing by carefully folding back a small corner and apply to the lens collar.

Zoom Sleeve

The LensCoat kit for the Olympus 100-400 includes an optional sleeve to cover the barrel that would be exposed when zooming. With the lens shade off carefully stretch the elastic over the front of the lens onto piece 3 and the end of the lens barrel or on piece 2. As you zoom in the sock will stretch and when it's zoomed out it will slightly bunch up.
